

Founded In 2021

## Problem

**5 tonnes of waste**  
per 100sqm fit-out  
**670,000 tonnes**  
furniture discarded

**COSTLY to  
businesses**  
**DAMAGING the  
environment**

### competitive pricing

comparable to the nearest market product

### long-term savings

up to 90% SAVINGS on reuse

### effortless installations

quick to build; no tools, mess or dust

### multiple products & markets

### sustainable & circular

## Our Solution

### Modular construction system for fast-build products made from recycled or bio plastic.

Various furniture and fit-out solutions: partitions, freestanding rooms, desks, sofas, stools, table bases, bays, tiered seating, shelving. Every product can be repurposed into new designs without waste.

#### Production

Manufactured from sustainable recycled or plant-based materials.

#### Supply & Design

Supplied to variety of clients; bespoke designs created.

#### Construction Support

Build instructions and installation services. Fire-rated materials available.

#### Circularity

End-of-use components collected for recycling or client repurposing.

## Competition

**Everblock** US company  
**Quickblock** UK company  
**Traditional joinery & products**

### Competitive advantage:

- Cost-effective with long-term savings
- Quick installations – no tools, mess, dust
- Simple to repurpose without waste
- Small format with improved aesthetics
- Versatile & sustainable
- Multiple uses across multiple markets
